

As PHDEC is facilitating all the stakeholders in the process of Mango Export to USA for commercial consignments, a filled template is being placed on the website for convenience of those exporters/packaging manufacturers who may be facing difficulty in understanding the documentation involved.

However, this template should not be taken as a complete document as the required documentation has to be prepared in line with the requirements laid down by USDA, Sadex Corporation and other US regulatory bodies involved. Further, your documents should be prepared in line with packaging material(s) used by you and product placed therein.

ABC PACKAGING
